PORTFOLIO OF SOUND PRODUCTS

In the world of music, sound is the very soul of creation. As musicians, our ears are our most valuable tool. Listening carefully allows us to capture every nuance, every tone, and every emotion we want to convey to our audience.

A close-up, black and white photograph of a person's ear. A custom-fit, purple, glossy earpiece is inserted into the ear canal. The earpiece has a unique, ergonomic shape. The background is dark and out of focus.

EARS** CUSTOM IN EARS

PROTECTORES
**ACOUSTIC
FILTER**

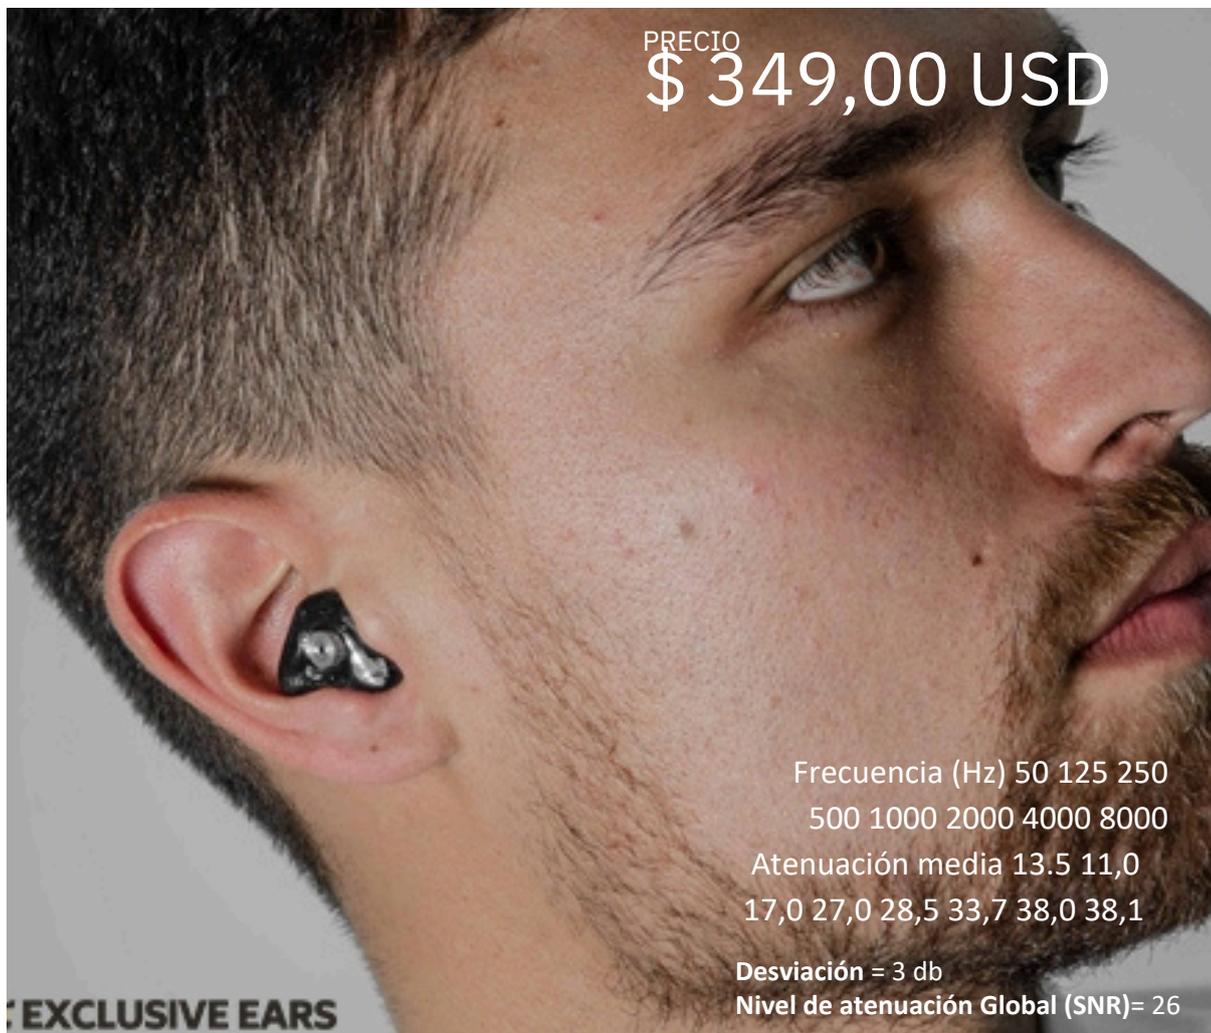

EMade of otoplastic vulcanized silicone material with an attenuation of 27 DB. The filter allows for ideal acoustic perception, with an adequate sound level that preserves hearing protection. This protector has the advantage of being highly resistant, comfortable and safe as it is made of high quality materials such as those offered by the German otoplastic supplies company Egger.

Colores piel, transparente, negro, naranja, amarillo, azul y verde.

PROTECTORS WITH VÁLVULA SONIC

Hearing protectors with a sonic valve are made of soft vulcanized biopor otoplastic material.

Their main purpose is to release pressure from the middle ear at high altitude levels and to promote rapid pressure compensation and prevent ear blockage, incorporating a sonic valve that performs this function.

PRECIO
\$ 349,00 USD

EXCLUSIVE EARS

ACOUSTIC SHOOTING

Programa 1.

It has been designed to amplify ambient sounds in order to have a timely reaction to almost imperceptible sounds, providing better hearing of what is happening around, attenuating the impact frequencies generated by firearms to a healthy sound pressure level.

Programa 2

((increased wind noise reduction)

Increases the amount of wind noise reduction provided. Ideal for shooting in extreme conditions.

It is a product tailored to the ear canal in order to provide comfort and greater soundproofing, it includes a button to select the environment and volume control to control the sound level.

It has 240 hours of autonomy

The devices are programmed to achieve maximum protection for general-purpose shots. It has two programs or environments:

deviation = 3 dB

Overall attenuation level (SNR) = 26

The housing is made of hypoallergenic otoplast acrylic, specially manufactured by the dreve company in Germany.
